What is Tizen? (Pronounced Tie Zen)

- A cross-device, open source software platform, including an operating system and user experience.
- Across multiple device segments, including smartphones, tablets, smart TVs, netbooks and in-vehicle infotainment systems.
- Tizen is a Linux Foundation project and is based on Linux and other popular upstream projects.
- We expect the first release of Tizen in 2012.

Year in Review for MeeGo / Tizen

- February: MeeGo's 1st Birthday
- February: A company made announcements
- May: MeeGo 1.2 Release & SF MeeGo Conference
- September: Tizen announced
- January: Tizen SDK & source posted

Still Going Strong!

Transition from MeeGo to Tizen

- Sustaining engineering support will continue for MeeGo v1.1 and v1.2 releases into 2012 to help with the transition.
- Intel is transitioning our ongoing MeeGo development efforts into the new Tizen project.
- Many people are preparing to transition their MeeGo products and development efforts to Tizen.

Application Developers and Tizen

- HTML5 and WAC API implementations to help developers maximize code re-use across multiple operating systems, app stores and devices.
- Alpha Tizen SDK & API available now
  - Web IDE, Emulator, Web API documentation, etc.
  - Runs on Ubuntu now. Other OS support coming soon
- These apps will be distributed in stores. Intel AppUp, for example, will support Tizen apps.

Learn More at developer.tizen.org

Source Code

- Alpha source code available for mobile devices now (smartphones and tablet devices)
  - Other device code coming soon
- Operating system source code, including middleware, basic UI, and menu interface
- Runs on the PC emulator.
- Plans for full source code for smartphones, tablets and additional device targets with a reference user experience available in the coming weeks and months.

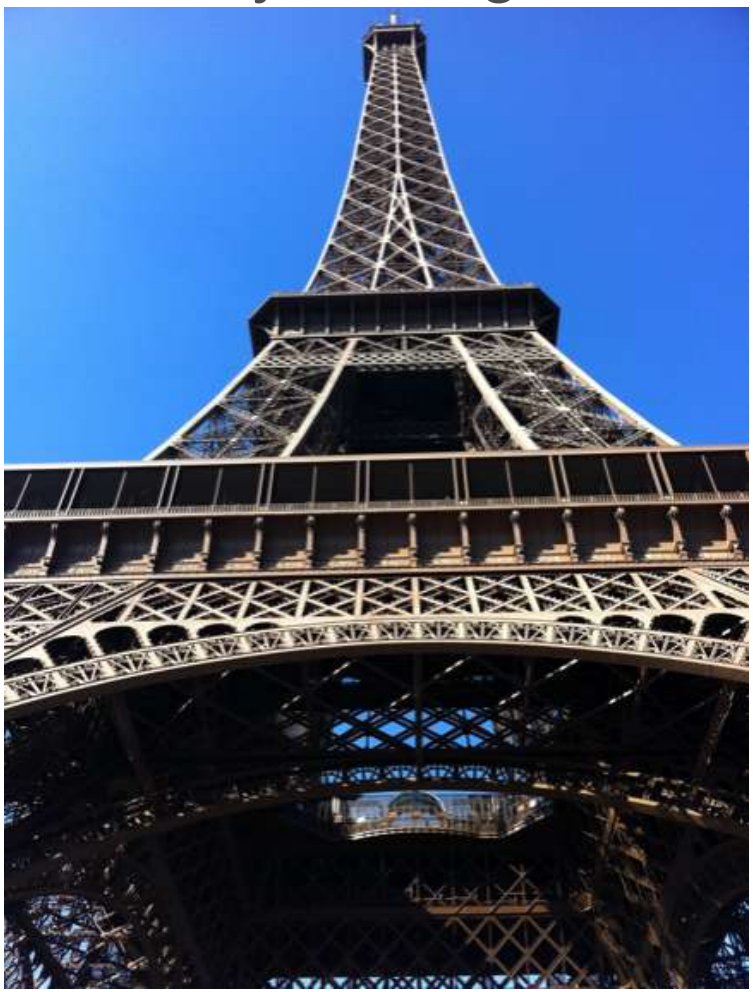
Open Source Community: What and Who

- Community includes all of the people who work on or with a project
  - **Product contributors:** kernel / distribution developers, release managers, quality assurance, localization, etc.
  - **App developers**: writing applications to run on devices
  - **Users**: people who run it on their device and provide feedback
  - **Vendors**: companies creating products based on the platform
  - **Other contributors**: promotion, moderation, documentation and more

Some people contribute as part of their employment at companies, while others contribute free time. The community includes all of the people who are doing interesting work on these projects.

What's Next with the Tizen Community

- Community Still Forming Now:
  - Mailing lists: https://www.tizen.org/community/mailing-lists
  - IRC: #tizen on Freenode
  - Twitter: @tizenproject
- Community Next Steps:
  - More mailing lists
  - Wiki for community documentation
  - Bug tracker
  - Conference participation
  - Other activities



Learn More at tizen.org/community

What's Next for the Tizen Community

- Provide more detailed documentation and technical information.
- Get the rest of the code into the open.
- Build out the rest of the Tizen community.
- Beta / final versions
- Expect first project release in the first half of 2012.

Learn More at tizen.org

Community Feedback

- What would you like to see for the Tizen Community?
- What should we keep the same / do differently from what we did in MeeGo?
- How can we improve?

April MeeGo Community Metrics Summary

- 3,534,575 unique people have visited MeeGo.com (cumulative total)
  - 295,992 unique people visited this month (333,293 last month).
- 22,914 people are members of MeeGo.com (was 21,823 last month)
  - Dev ML subscribers = 4983; Community = 3929; iL10N = 2871; SDK = 3313
- Mailing Lists: 4891 posts this month; 220 people posted 2+ msgs
- Forums: 862 posts. 123 people posted 2+ messages
- New Bugs Created: 1757; Bugs Resolved: 2988
- Active Users: Estimated at 800 – 1000 people.
  - Mailing Lists: 343 people posted (367 last month)
  - Forums: 229 people posted at least one item (281 last month)
  - Bugzilla: 716 people performed some action (552 last month)
  - IRC: 410-500 people logged into #meego simultaneously most days
