Quality Assurance

The work who no one want's to pay

About me

- Raphael Bircher

- Committer and PMC of AOO, IPMC Member Mentor at the Apache Incubator

- 10 year experience in QA (8 years at OpenOffice)

- New in the Open Source Business.

What makes QA challanging

- Testing all is impossible

- Let the user test didn't work

- Automated tests can't cover all case

- Intuitive tests lake szenario

Tools we have at AOO

- Junit Tests
- Manual testplan
- Beta versions

The problem is the collaboration between companies and QA

Here is a possible solution
