

BRUSSELS 4 FEBRUARY - 5 FEBRUARY

SUNDAY

SEE YOU NEXT YEAR

SUNDAY 5 FEBRUARY - FIRST PART

FOSDEM¹⁷.org

SUNDAY 5 FEBRUARY - SECOND PART

FOSDEM¹⁷.org

	09:00 - 10.00	10.00 - 11.00	11.00 - 12.00	12.00 - 13.00	13.00 - 14.00		14.00 - 15.00	15.00 - 16.00	16.00 - 17.00	17.00 - 18.00														
Janson Main Tracks		Portfolio of optimized cryptographic functions based on Keccak Gilles Van Assche 10.00-10.50	The Making of a Secure Open Source Password Keeper - From the Electronics to the High Level Software... Mathieu Stephan 11.00-11.50	It's time to SAFE the Internet Introducing SAFE, the decentralised privacy-first storage and communication network Benjamin Kampmann 12.00-12.50	Securing Automated Decryption New Cryptography and Techniques Nathaniel McCallum 13.00-13.50		WireGuard: Next Generation Secure Kernel Network Tunnel Cutting edge crypto, shrewd kernel design, and networking meet in a surprisingly simple combination Jason A. Donenfeld 14.00-14.50	Encrypting Matrix -Building a universal end-to-end encrypted communication ecosystem with Matrix and Olm Matthew Hodgson 15.00-15.50	Quantum computing and post-quantum cryptography - a gentle overview Andrew Savchenko 16.00-16.50	Using Linux in Air Traffic Control Hardware and Operating System Platforms Gerolf Ziegenhain 17.00-17.50	Closing FOSDEM 2017 FOSDEM staff 17.50-18.00	Janson Main Tracks												
K.1.105 Main Tracks		Write a Better FM Read The F* Manual? Maybe you need to write a better f* manual Rich Bowen 10.00-10.50	Bridging the Gap between Legacy Docs and Modular Content Robert Kratky 11.00-11.50	What open source and J.K. Rowling have in common Importance of storytelling in open source projects Justin W. Flory 12.00-12.50	RISC-V Open Hardware for Your Open Source Software Arun Thomas 13.00-13.50		Free Software For The Machine Keith Packard 14.00-14.50	Tempesta FW - Linux Application Delivery Controller Alexander Krizhanovsky 15.00-15.50	User Session Recording for the Enterprise An Open-Source Effort by Red Hat Nikolai Kondrashov 16.00-16.50			K.1.105 Main Tracks												
H.2215 Lightning Talks		Outlook CalDav Synchronizer. A.Nimmervoll 10.00-10.15	Kopano Jelle van der Waa 10.20-10.35	Connecting End Users and Developers With the Requirements Bazaar István Koren 10.40-10.55	Yet Another repo-man Anton Marchukov 11.00-11.15	Mailing List, Meet CI Stephen Finucane 11.20-11.35	Supercharge your collaboration with an Open Source Wiki Ludovic Dubost 11.40-11.55	tslib release party Martin Keplinger 12.00-12.15	libuv - Cross platform asynchronous i/o Saúl Ibarra Corretgé 12.20-12.35	Prove with SPARK: No Math, Just Code Yannick Moy 12.40-12.55	Analyze terabytes of OS code with one query Felipe Hoffa 13.00-13.15	SOFA - Real-time multi-physics simulation G.Paran H. Talbot 13.20-13.35	Open Student Information System H. Mendonça 13.40-13.55	Alyvix: Under the hood Francesco Melchiori 14.00-14.15	Energy data - what, how, and why Nico Rikken 14.20-14.35	Citybikes - Bike sharing networks around the world Lluís Esquerda 14.40-14.55	An open Gravimetric Phenotyping system Nathan Hughes 15.00-15.15	A free HTML5 Digital Audio Workstation (DAW) Melanie Ducani / Thomas Tortorini 15.20-15.35	GRUB New maintainers, news and future Vladimir Serbinenko 15.40-15.55	Interledger - Inter-networking for Money Evan Schwartz 16.00-16.15	FOSDEM infrastructure review Richard Hartmann 16.20-16.35		H.2215 Lightning Talks	
H.1301 Legal & Policy Issues	Back to sources: what's in your binary? Philippe Ombredanne 09.00-09.25	Patently - Are FOSS Companies Ready to Deal with Patents in the US and Europe? Robinson Tryon 09.30-10.15	Protect your freedom to operate with Open Patents Frederik Questier 10.20-10.45	Is the GPL a copyright license or a contract under U.S. law? Max Sills 10.50-11.15	F and in Freedom - Codes of Conduct & Community Guidelines Molly de Blanc 11.20-12.05	Why we need a legal framework to operate successfully a Trusted Service Provider Reinhard Mutz 12.10-12.35	Reflections on Adjusting Trust: The Mozilla Root Program - Tales of running an open and transparent Certificate Authority Program Gerv Markham 12.40-13.15	Increasingly permissive or increasingly dismissive? John Sullivan 13.30-14.15							Panel of European legal entities for Free Software projects Simon Phipps / Tom Marble / Karen Sandler / Moritz Bartl / Michiel Leenaars 14.20-15.05	FOSS and the GDPR Overview of key changes to EU privacy law that FOSS can use to promote individual's privacy and autonomy. Marc Jones 15.10-15.55	How We Talk About Free Software Legal Tools Deb Nicholson 16.00-16.25	Don't Send An Engineer To Do A Lawyer's Job Simon Phipps 16.30-16.55					H.1301 Legal & Policy Issues	
H.1302 Go and PHP & Friends	Welcome Daniel Esteban 09.05-09.30	Gomobile Android development with Go Daniel Esteban 09.05-09.30	Implementing 'tail -f' Fabian Stäber 09.30-09.55	gobpf - utilizing eBPF from Go Michael Schubert 10.00-10.20	High-performance IoT Using Go and Gobot Ron Evans 10.30-11.10	A pure Go implementation of Git Santiago M. Mola 11.15-11.45	High performance and scaling techniques in Golang using Go Assembly Frank Wessels 11.45-12.30	The status of Go What to expect in Go 1.8 Francesc Campoy 12.45-13.25	Two Years With Go and ZeroMQ - How I Learned to Love the cgo Brian Knox 13.25-13.55					From text logs to extensive automatic monitoring Sven Finke 14.00-14.55	Creating a dashboard with Laravel, Vue and Pusher Freek Van der Herten 15.00-15.55	Transform your monolith into a nice SOA app Mathieu Gillot 16.00-17.00								H.1302 Go and PHP & Friends

Information is correct as of Sunday 15th January. Please check fosdem.org/schedule for cancellations or amendments.

SUNDAY 5 FEBRUARY - FIRST PART

FOSDEM¹⁷.org

SUNDAY 5 FEBRUARY - SECOND PART

FOSDEM¹⁷.org

	09:00 - 10.00	10.00 - 11.00	11.00 - 12.00	12.00 - 13.00	13.00 - 14.00		14.00 - 15.00	15.00 - 16.00	16.00 - 17.00	17.00 - 18.00							
H.1308 Security	Desktop security, keeping the key to the castle safe Mickael Scherer 09.30-09.55	The PTags Linux Security Module José Bollo 10.00-10.25	Panopticon A Libre Cross-Platform Disassembler Kai Michaelis 10.30-10.55	Footprinting for security auditors José Manuel Ortega 11.00-11.25	How to audit, fix (and be marry) with OpenSCAP & Foreman Ondřej Pražák 11.30-11.55	Simulation of MITM in PEAP with hostap Siarhei Siniak 12.00-12.20	Is the Linux Desktop less secure than Windows 10? Hanno Böck 13.00-13.25	WTF my container just spawned a shell Jorge Salameo 13.30-13.55	Smart card forwarding Daiki Ueno 14.00-14.25	TLS Test Framework Hubert Kario 14.30-14.55	AF_KTLS - TLS/DTLS Linux kernel module Fridolín Pokorný 15.00-15.25	Usable Cryptography with José Nathaniel McCallum 15.30-15.55	Get the most out of your security logs Peter Czanik 16.00-16.25	H.1308 Security			
H.1309 PostgreSQL			Beyond Trust - PostgreSQL Client Authentication Christoph Moench-Tegeder 11.00-11.50	Tour de Data Types VARCHAR2 or CHAR(255)? Andreas Scherbaum 12.00-12.50	Replication & Recovery in PostgreSQL 10.0 Simon Riggs 13.00-13.50		Evolution of Fault Tolerance in PostgreSQL Gülçin Yıldırım 14.00-14.50	Infrastructure Monitoring with Postgres Steven Simpson 15.00-15.50	An overview of PostgreSQL's backup, archiving and replication Gunnar Bluth 16.00-16.50		H.1309 PostgreSQL						
H.2213 Testing & Automation	Future of Mobile Automation Testing, Appium steals it - Mobile Testing Future Srinivasan Sekar 09.00-09.45	Mutants, tests and zombies - aka mutation testing with Python and a pinch of Ruby Alexander Todorov 09.55-10.40	GitLab CI: (almost) effortless Open Source CI an introduction at how testing with gitlab CI is advanced, yet simple to manage 10.50-11.35	Can strace make you fail? - strace syscall fault injection Dmitry Levin 11.45-12.15	Testing web applications with traffic control Alban Crequy 12.20-12.30	Declarative Pipelines in Jenkins - A new way to define your pipelines in Jenkins Andrew Bayer 12.40-13.25	Do You Want to Retry?: Handling and Testing Network Failures	Anton Marchukov 13.35-14.20	Infer - A static analyzer for catching bugs before you ship Jules Villard 14.30-15.15	Using Containers for Building and Testing - Docker, Kubernetes and Mesos Carlos Sanchez 15.25-16.10	Test your docs Chris Ward 16.20-17.00		H.2213 Testing & Automation				
H.2214 Geospatial	Intro German weather data with R Berry Boessenkool 09.30-09.55	Intro to semantic annotations for geographic web maps in HTML Malte ReiBig 10.00-10.25	Khartis - How to simply create thematic maps in three steps Paul Girard 10.30-10.55	Find the best place in the city Carolina Arias Muñoz 11.00-11.25	Google Summer of Code 2016 @OSGeo Margherita Di Leo / Anne Ghisla 11.30-11.55	How to break the OpenStreetMap Ilya Zverev 12.00-12.25	Easily creating location-based applications with OSMAlchemy D. George / E. Jesinghaus 12.30-12.55	'Open Notices' - alpha - A global platform for official notices (planning, licensing etc) Richard Pope 13.00-13.25	airspace-v.com international hangar flying Thomas Bremer 13.30-13.55	Creating georeferenced digital elevation models from unmanned aerial vehicle images J.M.Friedt 14.00-14.25	Open Source Map Rendering with Mapbox GL Native Thiago Santos 14.30-14.55	Working with spatial data in Go Andrew Minkin 15.00-15.25	Big Spatio-Temporal Datacubes on Steroids ...and Standards Peter Baumann 15.30-15.55	What to expect from MySQL 8.0? Norvald H. Ryeng 16.00-16.20	Introduction to Boost. Geometry Adam Wulkiewicz 16.20-16.40	Geography on Boost. Geometry Fysikopoulos 16.40-17.00	H.2214 Geospatial
AW1.120 Electronic Design Automation	gnucap -- recent work and directions Felix Salfelder 09.00-09.25	QUCS project update Guilherme Brondani Torri 09.30-09.55	Integrated Spice Simulation with Kicad Tomasz Wlostowski 10.00-10.25	Discussion session on analogue simulation tools Guilherme Brondani Torri / Tomasz Wlostowski / Felix Salfelder 10.30-10.55	SpinalHDL An alternative hardware description language presentation Charles Papon 11.00-11.25	Tutorial: my first hardware design Tristan Gingold 11.30-11.55	Digital hardware design What can we learn from software development - and what not? Philipp Wagner 12.00-12.20	FLOSS Tools for High Level Synthesis - Integrating the FPGA into the Operating System Javier D. Garcia-Lasheras 12.30-12.55	Discussion session on HDL simulation and synthesis tools Philipp Wagner / Tristan Gingold / Javier D. Garcia-Lasheras / Charles Papon 13.00-13.25	Ruby bindings for Libgerbv Display and edit Gerber RS247X files the easy way Patrick Franken 13.30-13.55	Xorn: A new approach to code organization for gEDA/gaf How the attempt to Do Scripting Right changes the view of the world Roland Lutz 14.00-14.25	KiCad Project Status Wayne Stambaugh 14.30-14.55	Diving into the KiCad source code Maciej Sumiński 15.00-15.25	Footwork - PCB designs as code and EDA as code synthesis Kaspar Emanuel 15.30-15.55	Kitnic.it and 1-click BOM - Making web-enabled EDA tools using Javascript Kaspar Emanuel 16.00-16.25	Discussion session on PCB development tools Kaspar Emanuel / Wayne Stambaugh / Maciej Sumiński / Patrick Franken / Roland Lutz 16.30-16.55	AW1.120 Electronic Design Automation

SUNDAY 5 FEBRUARY - SECOND PART

FOSDEM¹⁷.org

	09:00 - 10:00	10:00 - 11:00	11:00 - 12:00	12:00 - 13:00	13:00 - 14:00		14:00 - 15:00	15:00 - 16:00	16:00 - 17:00	17:00 - 18:00							
UA2.220 Linux Containers and Microservices	Kubernetes 101 - Orchestration doesn't have to be difficult Josh Berkus 09.00-09.45	Taking containers from development to production Ratnadeep Debnath 09.50-10.35	gRPC 101 - building fast and efficient microservices Ray Tsang 10.40-11.25	Kubernetes Operators Managing Complex Software with Software Josh Wood 11.40-12.25	Open-Stack Magnum at CERN Trigazis 12.35-12.45	* 1 * 2	Cloud Native Java Development Bilgin Ibryam 12.55-13.05	* 3	Singularity - The Inner Workings of Securely Running User Containers on HPC Systems Michael Bauer 13.25-14.10		UA2.220 Linux Containers and Microservices						
UB2.147 Certification	LPI Exam Session 3 LPI Team 09.30-11.30			LibreOffice Exam Session 1 LibreOffice Team 12.00-13.00			LibreOffice Exam Session 2 LibreOffice Team 13.30-14.30				UB2.147 Certification						
UB2.252 A Monitoring and Cloud	What does "Monitoring" mean? Brian Brazil 09.00-09.45	Alerting with Time Series Fabian Reinartz 09.50-10.35	Trace Everything Jorge Salameo 10.40-11.25	Graphite@Scale or How to store millions metrics per second Vladimir Smirnov 11.40-12.25	Monitoring and Cloud Lightning Talks 12.35-13.20	Grafana - Past, present and future Carl Bergquist 13.25-14.20		Monitoring Kubernetes with OMD Labs Edition and Prometheus Michael Kraus 14.30-15.15	Social aspects of change Richard Hartmann 15.20-16.05	Deploying Prometheus at Wikimedia Foundation Filippo Giunchedi 16.10-16.55	UB2.252 A Monitoring and Cloud						
UD2.120 Python	Introduction to Pandas Sahil Dua 09.00-09.30	Python and "the SOLID principles" Jonathan Slenders 09.30-10.00	Storing metrics at scale with Gnocchi: The Python based time series database Julien Danjou 10.00-10.30	Selinon Fridolín Pokorný 10.30-11.00	Hacking midi devices with StepPy Yann Gravrand 11.00-11.30	GrimoireLab Jesus M. Gonzalez-Barahona 11.30-12.00	Script the Web with Weboob François Revol 12.00-12.30	Python Data Structures implementation Flavien Raynaud 12.30-13.00	Cloud Native Python Floris Bruynooghe 13.00-13.30	Debugging Hung Python Processes with GDB Brian Bouterse 13.30-14.00	Asynchronous programming with Coroutines in Python Ewoud Van Craeynest 14.00-14.30	Python and Raspberry Pi Ben Nuttall 14.30-15.00	How to run a stable benchmark Victor Stinner 15.00-15.30	prompt_toolkit Jonathan Slenders 15.30-16.00	asyncio - easier testing of asyncio code Martin Richard 16.00-16.30	Introduction to pyasn1 - Handling ASN.1-based protocols in Python 16.30-17.00	UD2.120 Python
UD2.218 A Embedded, Mobile & Automotive		How I survived to a SoC with a terrible Linux BSP - Working with jurassic vendor kernels, missing pieces and buggy code Luca Ceresoli 10.00-11.00	Open Source Car Control Josh Hartung 11.00-12.00	Kernel DLC Metrics, Statistic Analysis and Bug-Patterns Nicholas Mc Guire 12.00-13.00	Loco Positioning: An OpenSource Local Positioning System for robotics Arnaud Taffanel 13.00-14.00	Success and Failure in Building an Open-Source Software Platform for Autonomous Driving Systems Lukas Bulwahn 14.00-14.30	Device Tailored Compositors with the QtWayland Compositor Framework Andreas Cord-Landwehr 14.30-15.00	From zero to first test in your own LAVA laboratory Paweł Wieczorek 15.00-15.30	Testing with volcanoes - Fuego+LAVA : Embedded testing going distributed Jan-Simon Müller 15.30-16.00	Adding IEEE 802.15.4 and 6LoWPAN to an Embedded Linux Device Stefan Schmidt 16.00-16.30	OpenPowerlink over Xenomai Pierre Ficheux 16.30-17.00	UD2.218 A Embedded, Mobile & Automotive					
UD2. Corridor	PGP Keysigning 14.00-16.00									UD2. Corridor
