Nouveau
The overdue Status update

Karol Herbst
Goal

Reliable Open-Source driver for Nvidia GPUs
Updates - Kernel

- Modesetting support for Turing in 5.1
- Atomic modesetting support
- Reverse Prime improvements
Updates - NIR

- added in mesa 19.1
- required for OpenCL, Vulkan and GL 4.6 support
- can be tested with $NV50_{\text{PROG\_USE\_NIR}} = 1$
Updates - OpenCL

- added in mesa 19.3 for Fermi and newer
- can be enabled with `NOUVEAU_ENABLE_CL = 1`
- still a lot to do
- fixing OpenCL CTS fails
Updates - "Staffing"

- No big change in paid developers
- Intern at RH working on a Nouveau Shader cache
Big thanks to Ilia for his ongoing contributions!
No new "core" developers
Most old ones moved to other projects
No big contributions from others *sadface*
- Getting firmware for acceleration needs time
- No firmware for Power Management yet
Updates - Nvidia+

- It’s improving
- Some published documentation: https://github.com/NVIDIA/open-gpu-doc
- tagr contributes Tegra code
- Random patches from others as well
Work in progress

- Pass Khronos CTS for exposing OpenGL 4.4+
- Improving Performance
- Building a CI system
- OpenCL support
- OpenGL on Volta and Turing
Important tasks - kernel

- Fixing runpm
- Device hot unplugging (eGPU)
Important tasks - userspace

- Fixing multithreading
- Vulkan driver
- Context recovery
- Debugging features
How to help

- Own hardware with bugs running Nouveau and fix those
- Be interested and motivated
- GSoC/EVoC (for students)
How to help - Good entry level tasks

- Compiler opts
- Making use of GPU GPIOs
- Fixing Fan controlling (we have the docs for that)
