DPGA: What is a DPG and how to get certified?

The Digital Public Goods Alliance

A multi-stakeholder initiative launched in 2019 to accelerate attainment of the sustainable development goals in low- and middle- income countries by facilitating the discovery, development, use of and investment in digital public goods.

We are a unique network of governments, multilateral organizations, philanthropic foundations, funders, think tanks; and technology companies working on DPGs.

35+ Members (2023)

What is a
Digital Public
Good (DPG)?

DPG Definition & The Standard

"We must undertake a concerted global effort to encourage and invest in the creation of digital public goods: **open source** software, open data, open Al models, open standards and open content. These digital public goods should adhere to **privacy and other applicable laws** and best practices, **do no harm**, **and help attain the SDGs.**"

UNITED NATIONS SECRETARY-GENERAL ANTÓNIO GUTERRES

- √ Advance the SDGs
- ✓ Open Source
- ✓ Do No Harm

1. SDG Relevance:

Your digital solution must demonstrate relevance to one or more Sustainable Development Goals

2. Open Licensing:

Your digital solution must use an approved open license.

3. Clear Ownership:

The organisation that owns this digital solution must be clearly defined.

4. Platform Independence:

Digital solutions with mandatory dependencies imposing stricter restrictions than the original license should provide open alternatives, allowing for the replacement of such dependencies without significant modifications to the core solution.

5. Documentation:

Ensure your digital solution has robust documentation enabling a technical user not familiar with it, to independently launch and operate it.

6. Non PII Data Extraction:

For solutions handling non-PII data/content, implement mechanisms to extract or import such data in a non-proprietary format.

7. Privacy & Applicable Laws:

Ensure your digital solution adheres to relevant privacy, domestic, and international laws.

8.Open Standards & Best Practices:

Your digital solution must comply with relevant standards, best practices and/or principles.

9. A. Data Privacy & Security:

For digital solutions handling PII data, demonstrate measures ensuring privacy, security, and integrity of the collected information.

9 B. Inappropriate & Illegal Content:

Ensure digital solutions managing content have policies to identify and address inappropriate or illegal material, like child sexual abuse content, through effective processes for detection, moderation, reporting, and removal.

9 C. Protection from Harassment:

For digital solutions facilitating user interactions, establish processes for users to protect themselves from grief, abuse, and harassment, and implement systems ensuring the safety and security of underage users.

How do you become a DPG?

Becoming a Digital Public Good

Nominate

Technical Review

Recognition on Registry

Step 1: Eligibility

Take the 5 minute eligibility test

Is your digital solution ready to be a Digital Public Good?

The Eligibility Form requires you to answer 7 or 10 questions that will help you quickly determine if your digital solution can be nominated as a Digital Public Good (DPG) at this time. If your solution is eligible, you may continue with your nomination submission via the submission form. If your digital solution is not currently eligible, you will be given pointers on how you can improve it in order to make it eligible.

Want to know whether your favorite open, social impact project can become a DPG? Fill out this form and find out for yourself!
