

Scaling Open-Source Solutions to Achieve the Sustainable Development Goals: A Global Call to Action

Amreen Taneja, Standards Lead
Digital Public Goods Alliance

UN Sustainable Development Summit 2015

- In 2015, 193 countries came together with one shared vision: A better world for all by 2030.
- A commitment to people, planet, prosperity, peace, and partnerships.
- The result? The 17 Sustainable Development Goals (SDGs).

SUSTAINABLE
DEVELOPMENT GOALS

The SDGs: A blueprint for a Better Future

- 17 Goals. 5 years left.
- From ending poverty (SDG 1) to ensuring global partnerships (SDG 17), these goals are interconnected and essential.
- Technology, innovation, and collaboration are key drivers in achieving them.

The Digital Public Goods Alliance

The Digital Public Goods Alliance is a multi-stakeholder initiative launched in 2019 that accelerates the attainment of the Sustainable Development Goals by facilitating the discovery, development, use of, and investment in digital public goods.

We are a unique network of governments, multilateral organizations, philanthropic foundations, funders, think tanks; and technology companies working on DPGs.

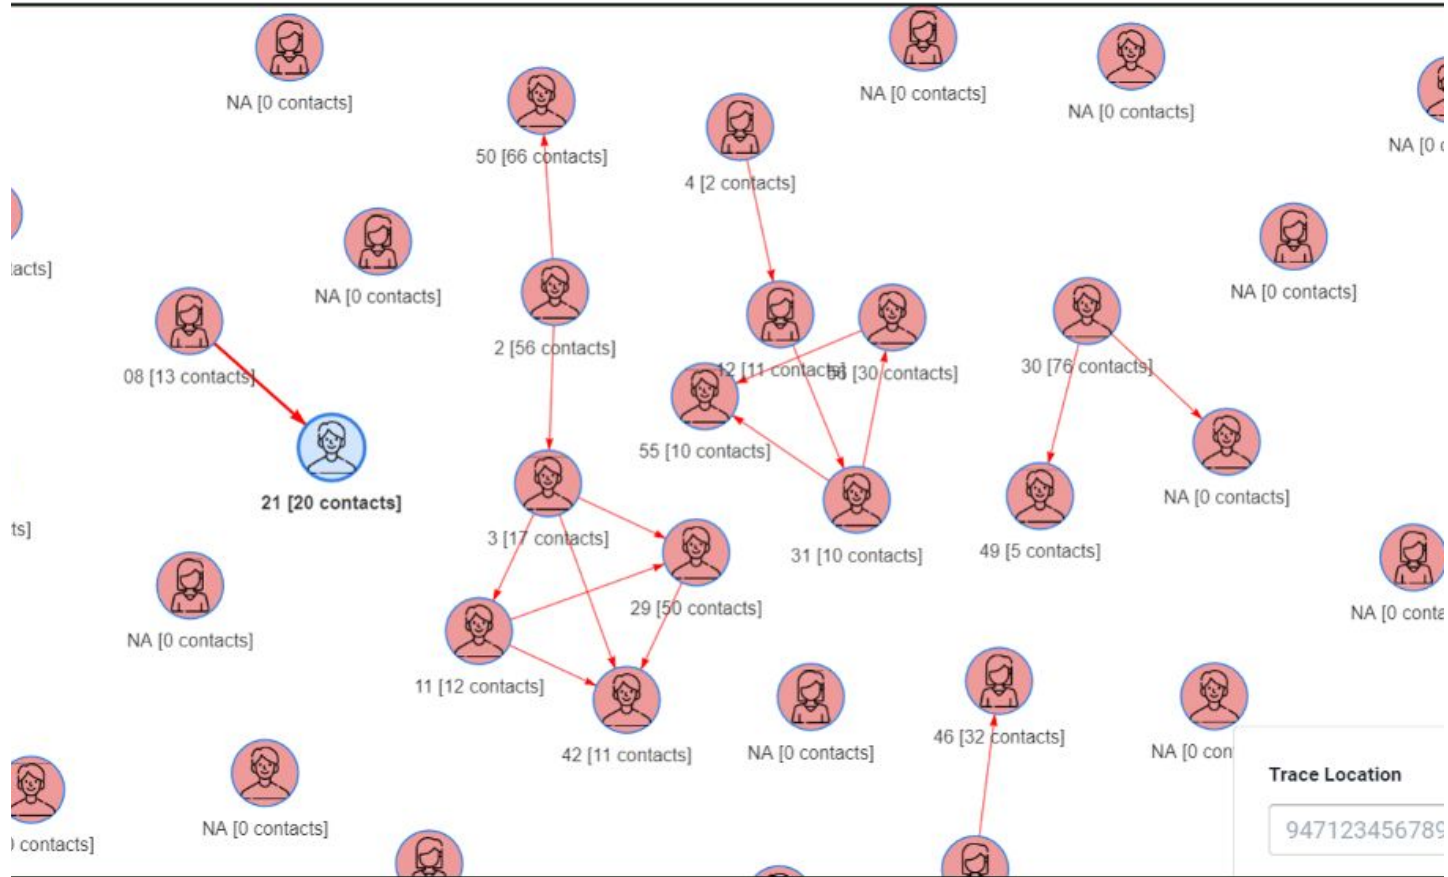

District Health Information System 2 (DHIS2) is the world's largest health management information system platform.

DHIS2 being used by  front-line workers in Sri Lanka

Digital technologies: electronic tools, systems, devices and resources that generate, store or process data.

Digital Public Goods

DPG Definition & The Standard

“We must undertake a concerted global effort to encourage and invest in the creation of digital public goods: **open source** software, open data, open AI models, open standards and open content. These digital public goods should adhere to **privacy and other applicable laws** and best practices, **do no harm**, and **help attain the SDGs**.”

UNITED NATIONS SECRETARY-GENERAL
ANTÓNIO GUTERRES

- ✓ Advance the SDGs
- ✓ Open Source
- ✓ Do No Harm

Public Good: a commodity or service that is provided without profit to all society members, either by the governments, private individuals or organisations which that benefit the public well-being.

Digital Public Goods

- ✓ Advance the SDGs
- ✓ Open Source
- ✓ Do No Harm

DPG Standard

1. Relevance to the Sustainable Development Goals
2. Use of Approved Open Licenses
3. Clear Ownership
4. Platform Independence
5. Documentation
6. Mechanism for Extracting Data
7. Adherence to Privacy and Applicable Laws
8. Adherence to Standards & Best Practices
9. Do No Harm by Design
 - 9.a) Data Privacy & Security
 - 9.b) Inappropriate & Illegal Content
 - 9.c) Protection from Harassment

Indicator 1. SDG Relevance

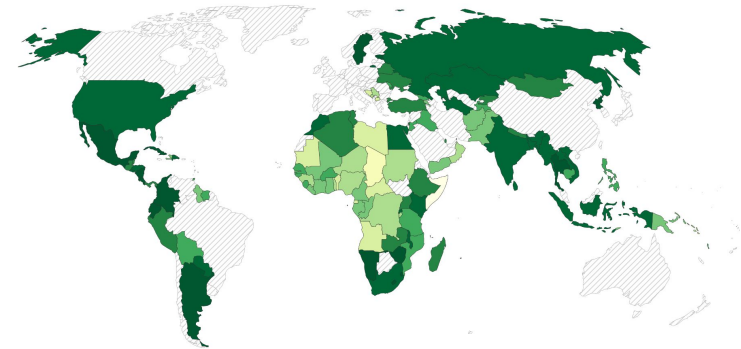

Demonstrated efforts into advancing one or more goals

Share of women whose family planning needs are met, 2021

The proportion of women of reproductive age (15-49 years) who are currently using at least one modern contraceptive¹ method, out of the total population of women who have demand for family planning² methods.

Our World
in Data

Data source: Data from multiple sources compiled by the UN

OurWorldInData.org/fertility-rate | CC BY

Indicator 4. Platform Independence

Prove independence from the closed component(s) and/or indicating the existence of functional, open alternatives

Google Maps

VS

OpenStreetMap

Indicator 7. Privacy and Applicable Laws

- EU General Data Protection Regulation
- The Indian Digital Personal Data Protection Act, 2023
- US Persons with Disabilities Act 2020

Indicator 8. Standards & Best Practices

Design for possibility of extracting or importing data in open formats

INTERNATIONAL MONETARY FUND

Digital Solutions Guidelines for
Public Financial Management

Open Standards

Best Practices

Open Source as a Key Driver for Delivering on the UN Sustainable Development Goals

2025

From MDGs...

The 8 goals that UN Member States have agreed to try to achieve by the year 2015

To SDGs...

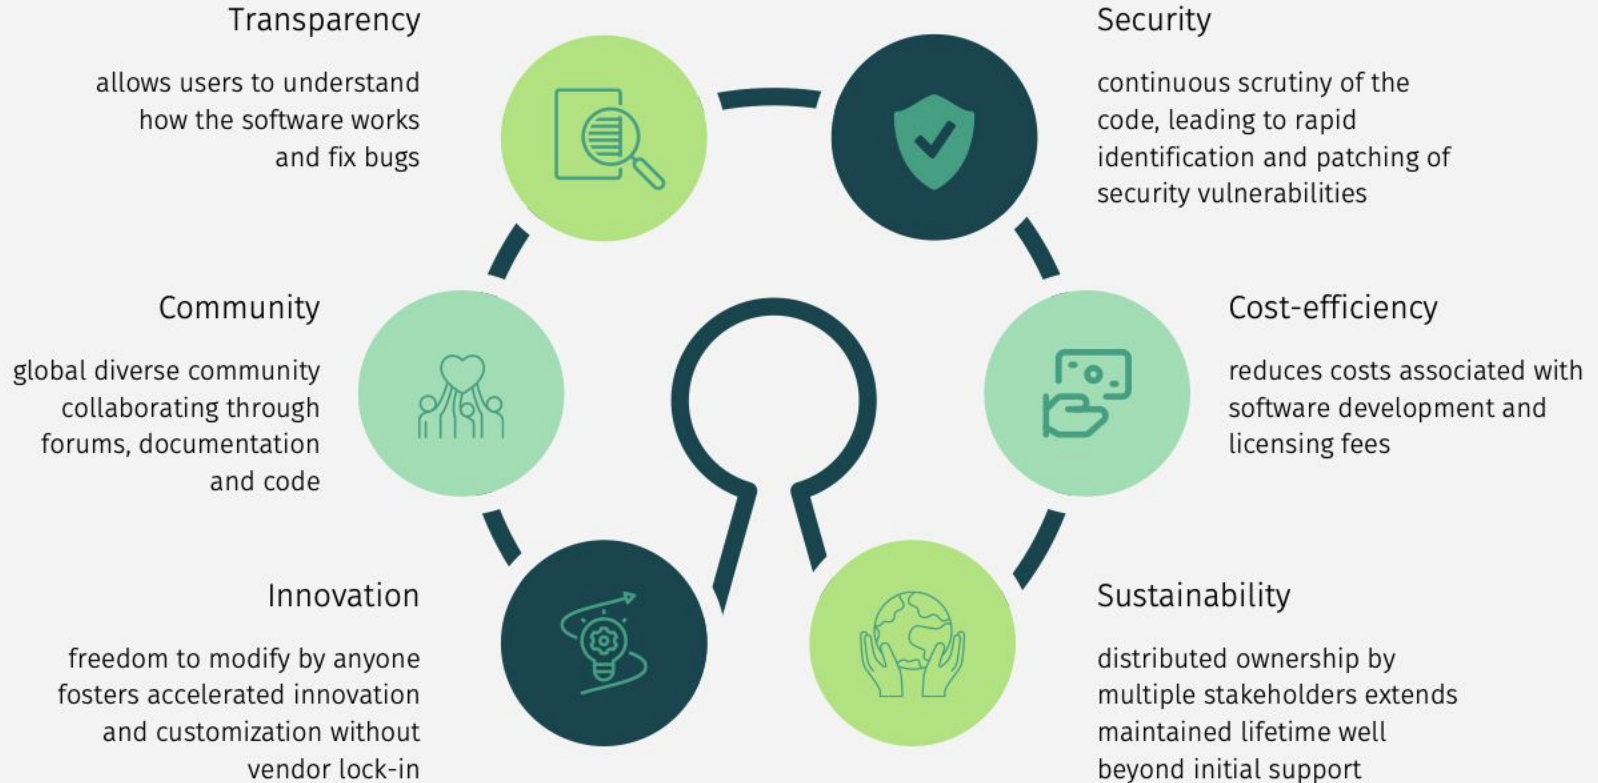

Open Source to Lead the Way

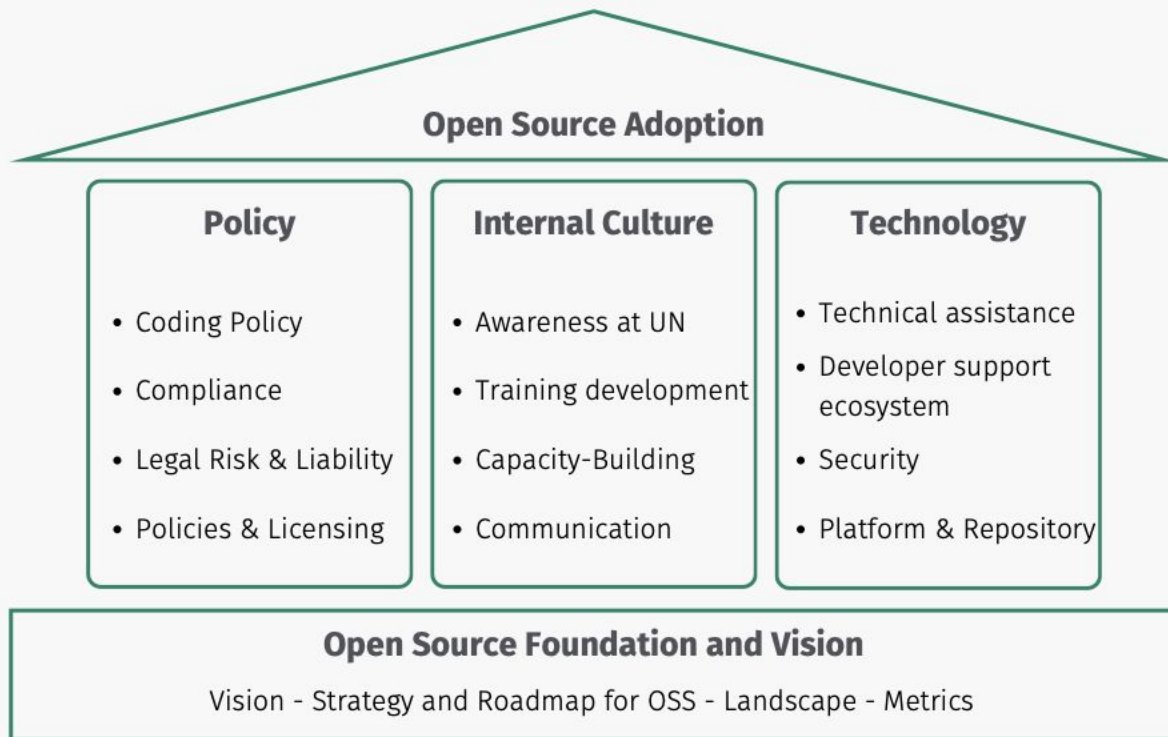

“Set the target of creating 1 million “digital champions” for the Sustainable Development Goals by 2030, a quarter of them in Africa,”

Why Open Source?

UN Open Source Strategy

From Open Source to Open Culture

Mind the Open Source Gap

Global Participation

~ Over 600 UN personnel registrations for each session

Internal OSCoP

Open Source Heroes

>500 members from diverse entities united by open source

UNLocked

Newsletter disseminating latest updates, innovations and trends of the open source landscape. Now in its 16th edition

Open Source Community Member Call

Open-ended call to touch base on open source practices across the organization with presentations on open source projects

<UNLocked/> November 2023 Issue #10

Unlocking the power of open source software within the UN.

ckan Architecture

Case study: CKAN

ckan is the Comprehensive Knowledge Architecture Network, an open source data management system that facilitates the creation of data products. Developed by the Open Knowledge Foundation. At its core, CKAN provides a robust framework for building data catalogs, allowing users to upload datasets, metadata, and documentation. Its flexibility and open source nature make it a powerful tool for fostering collaboration, transparency, and data-driven decision-making.

Through a web-based interface, administrators can upload datasets and associated metadata. CKAN's architecture allows for easy customization, ensuring that the platform aligns with the specific needs and branding of the organization.

The Humanitarian Data Exchange (HDX) is a notable implementation of CKAN that aligns with SDG 17's emphasis on partnerships. HDX serves as a collaborative platform where humanitarian organizations can share crucial data to support informed decision-making during crises. CKAN, as the underlying technology of HDX, plays a pivotal role in managing and sharing humanitarian datasets. Organizations contribute datasets related to disaster response, health, and other critical areas. By utilizing CKAN's capabilities, HDX enhances the discoverability and accessibility of humanitarian data, fostering partnerships and collaborations among various stakeholders, including governments, NGOs, and the private sector. This open data exchange strengthens how CKAN contributes to SDG 17 by creating a shared space for data collaboration, supporting collective efforts toward humanitarian goals.

LangChain: Open AI apps

LangChain is an open source framework that lets software developers working with artificial intelligence (AI) and its machine learning subset combine large language models with other external components to develop LLM-powered applications. The goal of LangChain is to link powerful LLMs, such as OpenAI's GPT-4, to an array of external data sources to create and reap the benefits of natural language processing (NLP) applications.

Developers, software engineers and data scientists with experience in the Python, JavaScript or TypeScript programming languages can make use of LangChain's packages offered in those languages. As its name implies, chains are the core of LangChain's workflow. They combine LLMs with other components, creating applications by executing a sequence of functions.

LangChain is open source and free to use. Source code is available for download on GitHub.

License of the day: AGPL v3.0

AGPL v3.0 is a permissive open source software license that allows developers to link their programs with libraries released under the AGPL v3.0 without requiring the proprietary software to adopt the same open source license.

The AGPL v3.0 preserves the user's freedom to modify the library's code while permitting the usage of the library in proprietary applications.

OSS4SDGs

- DTN CoP led
- Hackathons to promote Open Source for Good
- Targets one SDG each time
- Month-long with mentorship and winners

Fully Virtual

The challenges are hosted, and solutions are judged on Unite Ideas

Fully Open

Each solution is required to be Open Source with a requisite license

Reboot the Earth

First edition was held in 2019 at Malaysia, India, Egypt, Germany, NY & virtually

Second edition was held in 2024 in NYC, India, Ethiopia, Morocco & virtually

It takes collective effort of diverse agencies to harness the full potential of open source for meaningful impact.

That's why we created OSS CoP for all UN agencies

Open Source CoP - UN System

Key opportunities

Deep Dive: Team leads to proactively prepare questionnaires ahead of retreat, ensuring thorough exploration of recommendations. Additionally, provide insights on timeline for implementing the below recommendations.

SOFTWARE CATALOG

BUILD A CATALOG OF OPEN SOURCE AND POTENTIALLY OPEN SOURCEABLE SOFTWARE IN THE UN SYSTEM CATEGORIZED IN DIFFERENT VERTICALS SUCH AS MATURITY, SDGS IMPACTED AND EXISTING SUPPORT, AMONG OTHERS.

COMMON POLICY FRAMEWORK

WORK TOGETHER TO GENERATE A COMMON SET OF POLICIES, GUIDELINES AND GOVERNANCE FRAMEWORKS THAT COULD THEN BE SPECIALIZED AND OVERRIDDEN TO SUIT THE NEEDS OF EACH UN SYSTEM ORGANIZATION.

UN OPEN SOURCE LICENSE

DRAFT A UN SYSTEM-WIDE OSI COMPLIANT LICENSE FOR OPEN SOURCE DEVELOPMENT THAT IS FAITHFUL TO THE UN STATUS, IMMUNITIES AND PRIVILEGES WHILE ALLOWING OPEN PARTICIPATION BY THE GREATER WORLD.

CODE-HOSTING PLATFORM

BUILD AND MAINTAIN A UN SYSTEM-LEVEL OPEN SOURCE CODE-HOSTING PLATFORM COMPLIANT TO EXISTING QUALITY, LICENSE AND SECURITY POLICIES, WITH VOLUNTARY PARTICIPATION FROM SYSTEM ENTITIES.

CROSS-ORGANIZATIONAL CAPACITY BUILDING

EXTEND CAPACITY BUILDING ACTIVITIES BEYOND ORGANIZATIONAL BOUNDARIES TO BREAK DOWN MYTHS AND SKEPTICISM SURROUNDING STAFF INVOLVEMENT IN OPEN SOURCE USE, PRODUCTION AND CONTRIBUTION.

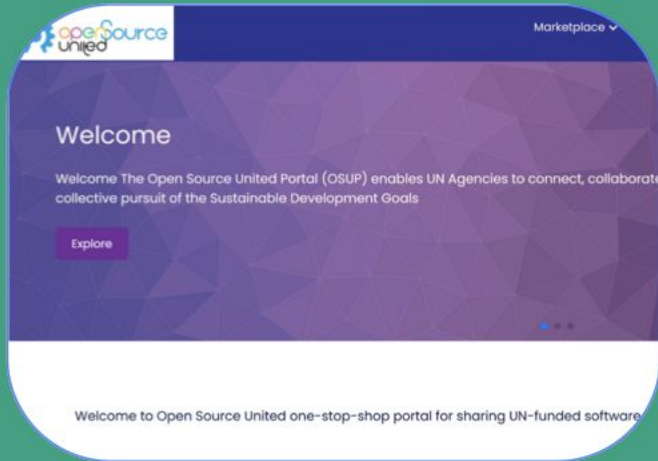

Open Source CoP - UN System

The executive summary
of the survey is available
at bit.ly/unosscop

UN Open Source Portal

One stop shop of all the open source projects at the UN, providing a unique destination for the open source community to coordinate development

OSP0s for Good 2024

CloudNativeHacks 2024

First ever hackathon at KubeCon

Advances SDGs through open web and AI applications

19-21 March, Paris

Runs alongside Kubecon+CloudNativeCon, the flagship open source and cloud-native conference with over 10k devs from all around the world

10 challenges, 10 SDGs

Each challenge targets a subset of the SDGs and were provided by our partners

Thank you!

Time for some
announcements!

Wikipedia is now a Digital Public Good!

WIKIPEDIA
The Free Encyclopedia

“Imagine a world in which every single human being can **freely share in the sum of all knowledge.** That’s our commitment.”

WIKIPEDIA
The Free Encyclopedia

Wikipedia helps to achieve UN-SDG goals

4, 5, 10, 16 & 17

Wikipedia's Role in Advancing SDGs

- **Free access to knowledge (SDG 4: Quality Education)**
 - Wikipedia as a global educational tool
 - Supporting lifelong learning opportunities for all
- **Community-driven content creation (SDG 5: Gender Equality)**
 - addresses gender bias on the platform by encouraging more women to contribute and ensuring that articles represent diverse perspectives

Wikipedia's Role in Advancing SDGs

- **Free access to knowledge
(SDG 10: Reduced Inequalities)**
 - Wikipedia as a global educational tool
 - Ensuring educational access in low-connectivity regions

- **Community-driven content creation
(SDG 16: Peace, Justice, and Strong Institutions)**
 - Enhancing transparency and fighting misinformation
 - Providing reliable and verifiable information

Wikipedia's Role in Advancing SDGs

- **Support for multiple languages
(SDG 17: Partnerships for the Goals)**
 - Bridging the digital divide
 - Collaborations with institutions and governments to expand access
 - Promoting linguistic diversity, preserving indigenous languages

Conclusion & Call to Action

- **Wikimedia as a force for positive change**
- **How you can contribute:**
 - Edit Wikipedia, support Wikimedia projects, advocate for open knowledge
- **Final Thought:**
 - Knowledge is a key driver for sustainable development – let's make it accessible to all!

Announcement No.2!

The TOR project is now a Digital Public Good!

**Open Food Facts is now
a Digital Public Good!**

Open Food Facts' Mission:
Reduce the **impacts of
the food system** on
health and the **planet**
everywhere

We're helping tackle UN-SDG goals 3, 12 & 13

The impact of food on health and the planet

An observation: growing negative impacts

- A global epidemic of obesity
 - Europe: 3% of GDP wiped (OECD)
 - France: 1 in 2 adults & 1 in 5 children are overweight
 - Annual cost: 20.4 billion euros (Public Treasury – 2016)
- Globally, food accounts for 1/3 of carbon emissions, 70% drinking water consumption & the majority of packaging waste.

The obvious:

It is important and urgent to act.

Obesity is one of the top three global social burdens generated by human beings

Estimated annual global direct economic impact and investment to mitigate selected global burdens, 2012¹

GDP, \$ trillion

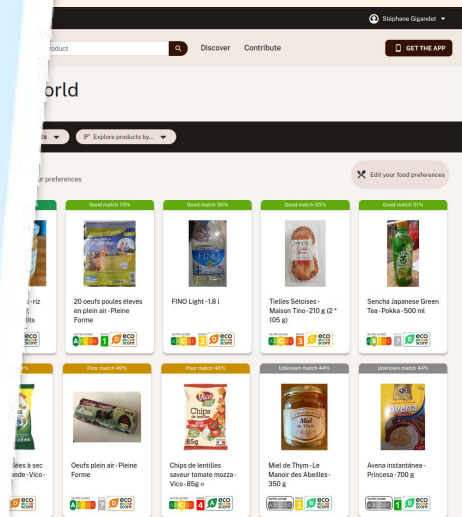

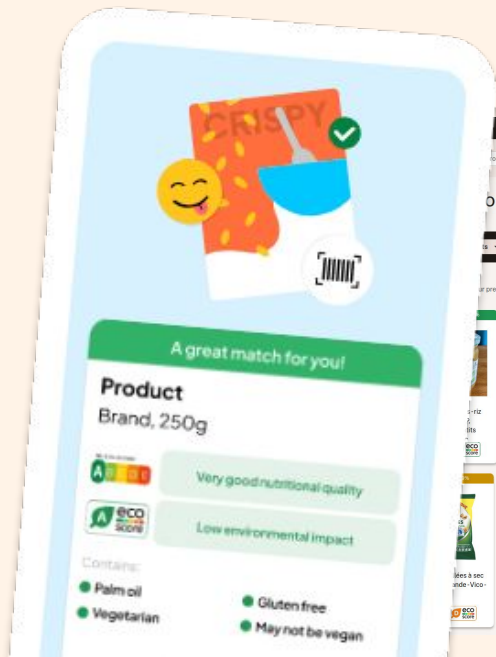

Empower global citizens to have an impact

- on their own health
- on the environment
- on the food system

Scan almost any food to see its impact on the **PLANET** and yourself

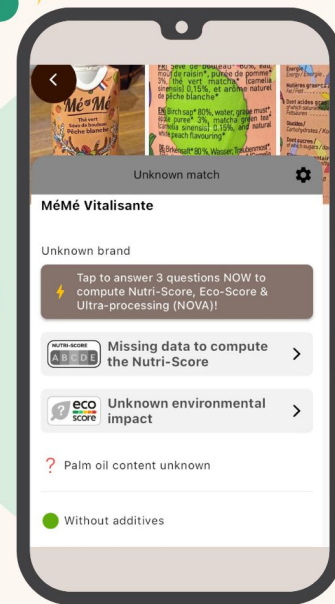

If a score is missing, contribute with missing data to unlock it !

Unlock scores

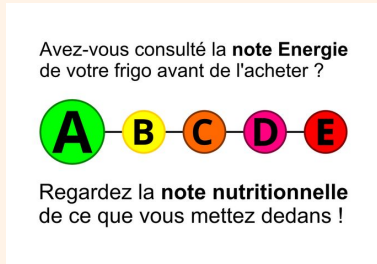

A score is not displaying for a product ? 😞

Answer a few questions that will help you compute the score ! 😊

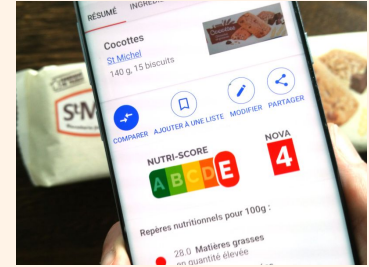

Our collective impact with Nutri-Score

Started displaying “Score 5C” on 15k products in 2015

Now computed worldwide on 630k products, using mobile crowdsourcing

Anyone can get it, even without manufacturer cooperation

Created an API ecosystem around the Nutri-Score

Now available in real-life in **6 EU countries** and under EU review
[30% of French products have a printed Nutri-Score](#)

Newly-launched products have a better nutritional profile **2021 ScanUp study**

Civil society can accelerate policy: Eco-Score

France will have an
Eco-Score

Eco-Score
in Colruyt

Taking part in Ecolabel
European discussion

0.7 M Eco-Score computed
Available for 1 bn consumers

Why Open ?

- It's in the name ;-)
- Builds trust (in food and more)
- Allows us to go faster in development
- Allows us to partner more easily with producers, governments, other organisations
- Allow others to build on top of it to go on topics where we wouldn't be able to go

Benefits of inclusion in DPGs

- 
- We are happy to be recognized for what we are
 - A lot of credibility to start conversations with more governments

Impact on SDG 4

- Reliability: >15 years
- Reach (ease of use):
 - 40M users (+4M/y), >80k portals, >180 countries
- Portability: Can run school on  Pi B+

Total Chamilo user accounts created (cumulative, by year) [2025-01-30]

Impact of Open Source on Chamilo

- High maintenance cost (infra, PRs, security) 🧊
- Most efficient way to “widespread” software 😊
- Big pusher for transparency/security 😎
- Worldwide community of excellence 🎉

Benefits of inclusion in DPGs

- Networking with like-minded projects
 - real-world readiness
- Increased visibility (DPGA advocacy plan)
 - -> increases our impact
