# AI Slop is everywhere, AI detectors don't work

AI • DELOITTE

Fiance's coworker showed her this photo of her boyfriend. We think she is getting scammed.

Yeah the handle is oriented differently than the suitcase

Daheat86 • 2d ago

Who wants their handle to close anyway?

Be aware, there is a AI Picture in circulation being used by various media outlets. It shows the ETR1000 folded in on itself, with the gemini proudly in the corner

Humans can still detect it.

Let's work together

Mixed content. The person is real and does travel, but the photos are heavily edited with AI tools. Captions show signs of AI writing but with personal touches. It's collaborative - human experiences processed through AI enhancement.

Classic influencer account with heavy AI involvement. Captions are clearly ChatGPT-written, photos are heavily processed with AI enhancement tools, and some 'travel' photos look suspiciously like AI composites. Human guidance, but AI-generated content.
